

# Breathe Easier with Nature's Perfect Air Sanitizer

## Himalayan Salt Crystal Lamps, Night Lights and Candleholders

Deep within the foothills of the Himalayan Mountains, the purest salt in the world was formed millions of years ago. Talented artist and craftsmen carefully select, then hand carve and shape unique salt crystals that are used to create our Himalayan Salt Crystal Lamps and Night Lights. Even our Luxury Bath Salts have been selected from the purest salt in the world. Everyone of our Himalayan Salt Crystal Lamps and Night Lights are a unique individual work of art, a one-of-a-kind masterpiece in its own style, color, beauty and design.

### ***Breathe Easier with the Power of Negative Ions.***

Negative ions are released as the salt is slightly heated by the internal light bulb.

If you have ever breathed the air after a thunderstorm, at the seashore or on a mountain top, then you have experienced the beneficial effects of negative ions – as they clean and freshen the the ambient air.

Negative ions can enhance your immune system, increase mental alertness and concentration, increase lung capacity and purify indoor air, control odors and help to eliminate airborne pollen, bacteria, mold and other pathogens.

Many studies throughout Europe have indicated dramatic health benefits. Thousands of people who suffer respiratory problems have reported relief from hay

fever, asthma and allergies, improvement with sinus related illnesses, migraines and reduced susceptibility to colds and the flu.

Wherever you place a Salt Crystal Lamp, the air will smell cleaner and you will be able to breathe easier. Our Himalayan Salt Lamps can help eliminate heavy odors from cigarette smoking, cat litter boxes, baby nurseries, cooking odors in the kitchen and the musty smell of mold mildew and bacteria in your laundry room, basement or garage.

The natural crystal beauty of our Himalayan Salt Crystal Lamps and Night Lights are the perfect decorative accent to any room in your home, office, dorm room, workshop or art studio.

In the workplace, they are ideal for your desk or workstation, in a conference room, employee break rooms and kitchens, waiting rooms, doctor offices, hospitals, prayer rooms, chapels, museums, art galleries, clothing stores, cafe or coffee shops, restaurants, nightclubs, hotel rooms, hair salons and massage therapy studios – any place where you want to clean, purify and freshen the air you breathe.

The radiant illumination of the soft glowing light of our Himalayan Salt Crystal Lamps and Night Lights will supercharge the air and create an enchanting environment that will inspire your imagination, relieve stress and awaken your senses.

### **Care and Use of Your Salt Lamp**

Our Himalayan Salt Crystal Lamps and Night Lights are highly suitable for almost any room in your home or at the office. They are beautiful, natural air cleaners and purifiers – and you never have to replace a filter, saving you hundreds of dollars in filter costs.

Salt Crystal Lamps and Night Lights are designed to be used indoors and should not be used in rooms where there is excess humidity, such as a bathroom or sauna. The perfect level of humidity is 30-60%. Excess humidity can cause a white powder to form on your salt lamp. To clean your salt lamp or night light, turn it on and wipe it gently with a soft damp cloth. Negative ions are only released when the salt crystal is slightly warmed by the internal light bulb. We recommend that you keep the light on 24 hours a day for maximum benefits.

### **Replacing the Bulb**

All of our Himalayan Salt Crystal Lamps and Night Lights have a wood base and include our unique Quick-Change Bulb Assembly. Our Quick-Change Bulb Assembly makes it very easy for you to change the light bulb.

To replace the bulb, unplug the lamp and lay it on its side. Squeeze the two metal ears of the Quick-Change Bulb Assembly and remove the light bulb holder. Replace the bulb with a 7 to 40 watt candelabra base bulb. Install the Quick-Change Bulb Assembly by squeezing the two metal ears and inserting it into the ring that locks the assembly.

**DANGER ELECTRICAL CORDS CAN BE HAZARDOUS!** Keep away from water, children, pets and sharp objects. Not for outdoor use. Misuse may result in fire or death by electrical shock.
